Descriptive List
of
Outstanding Gladiolus

EVERETT A. QUACKENBUSH
New Cumberland, Pa.

GREETINGS

In presenting our list of Distinctive Glads in new form, we again wish to thank our friends for their orders which have made it possible to incur the cost of a more expensive form of price list. While first orders are important, it is really the repeat orders which count in building up a business. The orders which we receive year after year, together with letters of commendation, indicate that our bulbs make satisfied customers. Since we do but little advertising, for new business we depend, to a large extent, on the friends of our customers who have been told of the fine quality of our bulbs. So, we thank our friends not only for their orders but also for making known to us and to others the splendid results which they obtain with our product.

FLORA FARMER

We are introducing no new varieties this year, preferring to wait until we have further tried the numerous seedlings which we are growing. However, we desire to especially direct your attention to our 1939 introduction, Flora Farmer, which we believe is worthy to be included in any collection of gladiolus. This is a very beautiful radiant, pure pink, with a creamy white throat. The florets are five to six inches in diameter and are slightly ruffled. Under ordinary conditions, it opens five or six florets at a time. Nearly all of the buds show color by the time the first floret opens, which adds greatly to its value for decorative purposes and as a commercial cut flower. It makes a strong, straight spike which does not fall over and which carries about eighteen or nineteen buds. It is a strong, healthy grower, making plenty of bulblets which germinate easily. Bulblets make good growth and sometimes produce blooms.

As a seedling, Flora Farmer received an award of merit from the Massachusetts Horticultural Society and a certificate of merit from the Empire State Gladiolus Society. In 1939, at the Boston Show of the New England Gladiolus Society, it won first in its color class in the advanced amateur section for Mr. Francis Curtin. At Algona, Iowa, three spikes entered by Mr. W. W. Gillespie, won first in the color class and were also judged the best three spikes in the amateur section. At the New York World Fair, it was granted an award of merit in the class for recent introductions.

Because of its unusual beauty and its many fine qualities, we believe it will become very popular and will be grown in large quantity for exhibition, for home decoration, and for cut flower purposes as soon as stock is available and the price gets down.

VARIETIES

As usual, we have tried to make our list selective rather than all inclusive. However, we have this year included a larger number of the newer varieties than has been our custom in the past. Some of these have been grown for too short a period to make certain that they will attain the gladiolus "Hall of Fame", but we have tried to include, of the newer varieties, only those having outstanding qualities which make them seem superior to and likely to displace certain other varieties now in common use.

In our opinion, each variety listed in our catalog has merit and is worthy of your consideration. As to whether you will like a particular variety may depend on your personal preferences and the purpose for which you wish to use the flowers. Remember that the price is not an indication of the quality of a variety. Newer varieties must of necessity be higher in price because of scarcity of stock. We suggest that beginners start with tried and true varieties in order to avoid disappointment. Growers with more experience and fanciers will want to try some of the newer ones. To such we suggest the following: Abe, Aladdin, Algonquin, American Commander, Black Opal, Carillon, Colonial Maid, Conquest, Coral Glow, Flora Farmer, Geheimrat Duisberg, Ivory Keys, Jasmine, King Lear, King Midas, Krytberg, Lavender Queen, Margaret Beaton, Mrs. C. P. Morley, Myrna, New Era, Peggy Lou, Rima, Surfside, Valeria, Vredenburg, Yellow Peril, and Zuni. All of these have much to commend them and some of them will doubtless eventually be classed with the great of the gladiolus world.

OUR GUARANTEE

All our stock is guaranteed to be healthy, vigorous, free from thrips, and true to name. **You must be satisfied.** If any stock is unsatisfactory, tell us and we will try to satisfy you. If you like our bulbs and our service, tell your friends.

PLEASE READ CAREFULLY

All quotations are subject to previous sale. We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders of a number of varieties. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time desired. No substitutions will be made without your permission. If we are out of a variety you order, your money will be refunded unless you give us permission to make a substitution in size or variety. Cultural directions will be included with all orders.

All orders from the retail list will be prepaid to points in the United States. Prices as indicated in the quantity list are not prepaid, but are F. O. B. New Cumberland, Pennsylvania. If you wish to order part from the retail list and part from the quantity list, we will send the order transportation collect and include extras or overcount to make up for the transportation on the retail items. A discount of 5% will be allowed on cash orders of \$2.00 to \$5.00. On cash orders of over \$5.00, a discount of 10% will be allowed. These discounts do not apply to mixtures nor to orders from the quantity price list. We also include worthwhile extras with retail orders. The value of the extras will be in proportion to the sizes of the order. Suggest varieties desired as extras. If we have sufficient stock, we will be glad to comply with your request.

Where a variety is listed at 2 for 10 cents or 2 for 12 cents, please do not order a smaller number at a lower price. Five bulbs will be sold at one-half the price of ten, but no single item will be accepted for less than 10 cents. Where no 10 price is indicated, it may be found by multiplying the price of a single bulb by 8. Twenty-five bulbs of the same size and variety will be sold at 2 times the price of 10. One hundred of the same size and variety will be sold at 8 times the price of 10.

Where bulblets are sold by the packet, 25 to 50 or more will be included in each packet. We will give good value.

Do not ask for special quotations unless you have a large order. Our prices are very low for the high quality bulbs offered. However, we are glad to furnish special quotations to jobbers, growers, and others purchasing in large quantities.

All bulbs listed as large size are $1\frac{1}{4}$ inches and up, mostly $1\frac{1}{2}$ inches and up, in diameter. Medium size bulbs are $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter. Small bulbs are $\frac{1}{4}$ to $\frac{3}{4}$ inches in diameter. For the finest blooms, large bulbs are best. Medium size bulbs of most varieties will give nice cut flowers, but the spikes are not as long as from large bulbs. Although small bulbs of many varieties will bloom, others will not. The blooms from small bulbs will be noticeably smaller in size. Bulblets seldom bloom and are often difficult or impossible to germinate. We do not recommend them except to experienced growers.

JOIN A GLADIOLUS SOCIETY

Persons interested in the growing of gladiolus, should join a society. The benefits and information received are worth much more than the dues. We hold membership in the following societies: Blue Ridge Gladiolus Society, Empire State Gladiolus Society, Maryland Gladiolus Society, Metropolitan Gladiolus Society, and the New England Gladiolus Society.
